02 Countries | 08 States | 57 Participants | 35 Locations

TOTAL COUNT 01–02 JANUARY, 2022

1607 INDIVIDUALS

Indian Skimmer Total Count

TOTAL COUNT AT THE HIGH CONGREGATION SITES

ABOUT THIS INITIATIVE

The aim of the Indian Skimmer Count is to gather information about the Indian Skimmer *Rynchops albicollis* population across its distribution range. It is conducted in two phases by Bombay Natural History Society (BNHS) in association with Bird Count India. In January 2022 the event saw participation from birdwatchers, photographers and other citizens from India and Bangladesh who surveyed various sites and contributed their valuable data. Skimmers were recorded at 8 sites in India and one site in Bangladesh

For further details, write to skimmercount@bnhs.org

CAUTION The results presented here are based entirely only on the counts contributed by members of the public from different parts of India and Bangladesh. Although we trust that every count has been contributed with good faith and the best intentions, the total count shown here must be interpreted with caution as this data is compiled based on only two days survey
