### 2291 INDIVIDUALS

Indian Skimmer Total Count	
INDIA	1239
BANGLADESH	1052

## TOTAL COUNT AT HIGH CONGREGATION SITES

## ABOUT THIS INITIATIVE

The aim of the Indian Skimmer Count is to gather information about the Indian Skimmer *Rynchops albicollis* population across its distribution range. It is conducted in two phases by Bombay Natural History Society (BNHS) in association with Bird Count India. This is the third year of this initiative and in January 2023 the event saw participation from birdwatchers, citizens & photographers from India & Bangladesh. They surveyed various sites and contributed the valuable data.

For further details, write to [skimmercount@bnhs.org](mailto:skimmercount@bnhs.org)

**CAUTION** The results presented here are based entirely only on the counts contributed by members of the public from different parts of India and Bangladesh. Although we trust that every count has been contributed with good faith and the best intentions, the total count shown here must be interpreted with caution as this data is compiled based on only two days survey
